

Install apk on firestick

Continue

Vamos a explicarte cómo instalar aplicaciones de terceros en tu Amazon Fire TV Stick. Cuando te explicamos cómo instalar aplicaciones, vimos que el dongle de Amazon utiliza un repositorio interno en vez de Google Play a la hora de permitirte instalar apps. Esto le da un mayor control para asegurarse de que las aplicaciones son seguras, pero limita bastante su catálogo. De ahí que también te vayamos a explicar cómo instalar aplicaciones externas de terceros que no están en ese repositorio. Eso sí, te advertimos que tienes que tener un cuidado extremo con este método e instalar sólo aplicaciones que conozcas de fuentes fiables, ya que puede ser una importante puerta de entrada para malware y virus de todo tipo. Antes de instalar aplicaciones de terceros, tienes que configurar el Amazon Fire TV Stick para que las acepte y pueda instalarla. Para ello, en el menú principal pulsa hacia arriba con el mando, y cuando estés en las opciones superiores selecciona la de Configuración (1). Una vez en la configuración, pulsa sobre la opción Mi Fire TV (2) para entrar en la sección donde puedes configurar lo referido al dispositivo. Amazon sabe que esta opción de instalar aplicaciones de terceros es insegura, por lo que la tiene algo oculta. Una vez estés en la sección de Mi Fire TV, selecciona y pulsa sobre Opciones para desarrolladores. Una vez estés dentro de Opciones para desarrolladores, marca como activadas las dos opciones que te aparecen dentro, la de Depurado ADB y la de Apps de origen desconocido. Cuando lo hagas, sobre todo al activar la segunda, ya podrás instalar archivos APK, que es como en Android se le llama a los ejecutables. Busca y descarga las apps de terceros La manera de proceder ahora depende un poco de ti. Lo único que necesitas es utilizar una aplicación con la que puedas descargar archivos APK de internet. Algunos usuarios utilizan directamente Firefox, pero también puedes optar por otras como Downloader. En ambos casos, tienes que ir a la sección de Categorías en el menú superior, y pulsar en la sección Utilidades. En utilidades debes elegir la aplicación que quieres utilizar y descargarla. Nosotros nos hemos decantado por Downloader porque tiene tanto navegador como gestor de archivos, pero puedes utilizar cualquier otra. Elige la aplicación que elijas, necesitas que tenga un navegador para ir a la web de la APK que quieras descargar. En el caso de Downloader, pulsa sobre la opción Browser de la columna izquierda y entrará al navegador. Una vez entres en el navegador, ve a la web de la app que quieras instalar y descárgate su archivo APK de instalación. En este punto nosotros ya no te vamos a decir qué aplicaciones debes cargar, pero sí te recordamos que intentes que sean fiables y de fuentes o páginas también fiables, a poder ser las oficiales, ya que si no te expones a instalar algún virus en tu dispositivo. Una vez lo descargues, ejecuta el archivo APK para iniciar el proceso de instalación. Este proceso sólo será posible si antes has habilitado las apps de origen desconocido. En el proceso de instalación tendrás que conceder permisos de acceso al dispositivo, y se te informará de todo en una pantalla donde tendrás que pulsar el botón Instalar. A specially customized version of Android runs on Amazon's FireTV which can handle almost any Android application. Though you will find most of your favorite apps on Amazon Appstore, you wouldn't find some third-party applications. All you need in that situation is to install the APK files on your Firestick or FireTV. Though you might install a third-party application on your FireTV, the application might not run smoothly or run at all. This might be due to compatibility issues. For example, an app that is compatible with a touch screen device will not work with a remote. You might still want to try your luck with these applications. Follow this guide to learn how to download and install APK files on Firestick or FireTV. Install APK Files on Firestick or FireTV From an Android Device An Android device is a good option to copy applications to a FireTV device with the help of applications such as ADBLink, by Koni. You can get it from the Play Store or by clicking here. The apps that are installed on your Android device can be copied and transferred to your Firestick device through ADBLink. Before you can run ADBLink, you have to first enable Debugging Mode on your FireTV. Here is how you do that. Enabling Debugging Mode on FireTV Select Developer Options. Set the ADB Debugging to ON. NOTE: To install third-party applications on your FireTV, make sure you set the Apps from Unknown Sources option to ON. Using ADBLink To Install APKs on Firestick Launch ADBLink to initiate the installation procedure. Once done, move to the Setup tab to choose FireTV from the network. Make sure you have switched on your FireTV device so that the ADBLink app can scan and find it. If the app still cannot find your device, enter FireTV's IP address manually inside the app. To find your Firestick device's IP address, navigate to Settings > My Fire TV > About > Network on your FireTV. The IP address of the device will be displayed on the right-hand side of the screen. Once the configuration is complete, you can choose an app from the list of installed apps on your device. Alternatively, you can also select the APK file of an app stored on your device. To do so, tap on the Upload button on the top-right corner of the app and navigate to the /storage/emulated/0/Downloads folder. After you are done with choosing the app, the installation procedure shall start. How quickly the app installs on your FireTV depends upon your device's configuration and the Internet speed. Once installed, you can see your app in the 'Your Apps and Channels' section on the Home Screen of FireTV. Install APK Files on Firestick or FireTV From a PC Another method to install APK files on your Firestick or FireTV is with the help of a PC. The steps might be a bit long but are very easy to understand and implement. Stay with us till the end of this guide to learn this technique. But before that, please ensure that your PC and the FireTV are connected to the same Wi-Fi network for this to work properly. Type ES File Explorer in the search box. Select the ES File Explorer File Manager icon on the following screen. Click on Download/Get to download this app on your device. Once installed, click on Open to launch the app. You will also be able to find this app on the 'Your Apps and Channels' section Grant all the permissions to ES File Explorer. This is necessary for the functioning of the app. On the main screen, select View On PC. A new screen will appear displaying the Wi-Fi network your device is connected to. Click on TURN ON. You will now see an FTP address. You will need this very soon. Follow these steps on your PC: Using any of the web browsers like Google Chrome or Mozilla Firefox, download the APK file of the app you wish to install on your Firestick device.Open any folder on your computer. On the address bar, paste the FTP address you saw in Step 9 and press Enter.You now will see all the folders present on the Firestick device. Open the folder inside which you want to have the APK file present. Copy and paste the APK file here that you downloaded.Inside the ES File Explorer app on your Firestick, expand the Local menu on the left-hand side of the screen. Choose the Home option (there will be two of them) that does not have a Home icon with it.Open the folder where you just pasted the APK file of the app inside the Firestick folders. Click on the APK file and install it. Following the steps above will have installed the application on your Firestick or FireTV device. Installing the third-party applications this way is also known as Sideload. The above two methods are very common sideloading methods for FireTV, Firestick, and other Android devices. Installing APKs on Firestick and FireTV is very simple and needs no prior experience or knowledge, as you must know by now. You can now go ahead and install your favorite applications on your FireTV device without much of a hassle. You're welcome! Firestick is a media device that lets you stream games, movies, and music when connected to the internet. It transforms your TV into a smart one just by plugging it in. Throughout this guide, you will learn how to install Apk apps on Firestick by sideloading.Most users who have been using the Firestick device for a long time know that they are a lot of apps missing from the app store. That is to say, you might be lacking some features that will make your experience with the fire stick device more enjoyable. Sideloading gives you the advantage of installing third-party apps such as the Kodi app, or VPNs.Read more to learn how to install third-party apps on your Firestick device.How to Install APK Apps on Firestick Device?First and foremost, you will be enabling the developer options to get your firestick device ready for sideloading.1. Prepare your Firestick Device for APK InstallationNavigate to Settings on your Firestick device.Then scroll left till you find the Device option. Click on it when you see it.Continue by selecting the Developer Options.Next, you will see ADB debugging turn the toggle On.A prompt message will display when you click the toggle for Apps from unknown sources options.Finally, click Turn On to confirm.Your firestick device is ready for APK apps installation now.2. Install ES File ExplorerLaunch your Firestick and make sure you are connected to the internet.Next, navigate to the Home menu on the Firestick.You will see a search bar icon at the top, select it.Type in ES File Explorer in the search bar, and click enter.You will see the app icon among the return search results click on it to expand.Next, click on the app icon to begin download and installation.When the installation is complete, the get option will change to open.Select the Open option to launch the application.Install APK Apps using ES File ExplorerLaunch the Es File Explorer.Look to the left-hand pane. You will see Tools Options click on it.When you click Tools a few options will display. Choose Download Manager.Look below the screen. You will see + New option. Select it.Next, a prompt input Path and Name field. Type in the URL of the app you intend to download. Also, choose a name.Continue by clicking on the Download Now button just beneath the input fields.When the app is done downloading, the option Install will display.Next, click on it to begin the installation.Wait till installation is complete, and click the open button by the right corner 3. Install Apk Apps on Firestick using an Android PhoneFor this step, you need to make sure you download and install the ADBLink app.Launch the ADBLink app and look to the top right corner to select the three-dotted menu icon.Next, some options will display.Then among the options select Setup, and choose Network afterward.A field for IP address input will display.Now on your Fire TV, go to Settings and navigate to My Fire TV menu.Click on Network next, and you will see an IP address on the right side.Take note of the IP address, and switch back to your mobile device type it into the IP address field on your phone.Click save when done.Click on the IP address on the phone.Select Local Apps options next.A list of apps will be displayed. Scroll through them to select the app you wish to install on your Fire TV.Click on it to begin the installation process.Finally, your Fire TV will display a message. Select OK to complete the installation.
