Daily SOAP Note

Arthur Bach DOB: 1/23/1967 Wednesday, July 11, 2012 Office visit #2

SUBJECTIVE:
 The patient explained to me that he has been feeling much better since his last office visit. When I asked the patient to rate his intensity on a scale of 0 to 10 with 0 being nothing and 10 being his most intense pain, Arthur gave his Right Sacroiliac Region a 4 since his last office visit. The activities that aggravate the patient's condition have not changed and include when he bends, sits, stands up, works out and runs. The patient also said his symptoms are improved when he gets adjusted and receives the combination of therapies at the office. The patient also informed me that he has been doing all of the exercises he is supposed to do on a regular basis.

OBJECTIVE:
 Observation of the patient's active range of motion revealed decreased lumbar right rotation with pain and right lateral flexion with pain. I observed spasms in Arthur's right lower lumbar. I noted that the patient had moderate trigger points on his origin of the right piriformis. While palpating the patient, I noted severe tender taut fibers over his Right Sacroiliac Region. Orthopedic testing revealed Nachlas was positive, Yeoman's Test was positive, Laguerre's Test was positive and Hibb's Test was positive. Examination of the patient in the prone position, revealed a half of an inch functionally short right leg length.

ASSESSMENT:
 The prognosis for the patient at this time is good because the patient is responding well.

PROCEDURE/PLAN:
 Eight minutes of continuous ultrasound at 1 Mhz was used to increase the blood flow, decrease the muscle tonicity, and to decrease the discomfort over Arthur's Right Sacroiliac Region (97035). The Graston technique was applied for four minutes over the patient's Right Sacroiliac Region to improve muscle and ligament performance and possibly reduce any peripheral nerve impingement caused by adhesions (97140-59). I performed the Diversified Chiropractic adjusting technique over all the patient's

TOEFL Speaking: Example response B for Qu. 2 on Test 2

Topic => I would have to say that I agree – that it's actually better to study in collaborative pairs or groups.

Main Reason (1) + supporting details & examples My first reason for this is... I think this is actually quite representative of what... real world working situations involve. You know, whether it's... business or science or even education – a lot of the work you do will involve working with other people in teams to... reach certain objectives or goals.

Applicants are not informed when they call and/or stop in the office that the date the CAF Page 1 is received determines the date benefits begin. The agency must accept and file a CAF with only a name, address and signature.

County/Tribal completes 1 through 4 below.

1. Describe what caused the deficiency (ies) and how frequently it is occurring:

New staff and coverage by staff from other departments were not trained sufficiently to inform applicants when they call and/or stop in the office that the date the CAF Page 1 is received determines the date benefits begin. This is happening frequently, especially when an applicant calls the agency for information about applying for SNAP benefits.
