Companion App.Play smarter, win more, and stay connected to the world of Call of Duty wherever you go.EARN REWARDSLog in or sign up and receive special rewards each week just by opening the app.TRACK AND COMPARE STATSSee your stats across supported Call of Duty games with a detailed
 app-exclusive Combat Record. Plus, compare stats with your friends.CONNECT WITH FRIENDSSee when your friends are online, what they're playing, and their current activity. React to their achievements and stay connected on-the-go.COMPETE WITH YOUR SQUADJoin a Squad, or create your own, and compete against other Squads for the top
spot in weekly tournaments. Place in the top 3 to win exclusive in-game rewards. Jul 27, 2021 Version 2.23.2 What's New - General improvements and bug fixes Update 4: The Results screen is fixed!Still recommended taking screenshots this week in case the bug come back, but everything looks good now!Way to go App Team!Update 3: There were
 updates yesterday, which fixed the rewards issues. All earned rewards for last week have been granted. So, props to the app team for that!On the down side, the "Results" screen is still broken; it still shows incorrect results for last week. It calls into question whether it will be fixed in time for this week's tournament, and whether the results issue will
come back again or not. All users should keep an eye on their scores, in case you don't get your rewards this week. Update 2: The app is still broken. My squad was in first place all week, but with the weekly tournament is definitely
in question and this error casts doubt on all of the results the app calculates. Update 1: Still needs work. The obvious errors are corrected, but the team totals on the leaderboard in the app. Activision better
fix this before this week's tournament is over so that rewards are given out fairly. Hi, can you send us more details about the issue you're having? Please email codcompanionapp@activision.com. Thanks. I was really excited about this app when I read all the new features the developers were adding in. However, the follow through is lacking to say the
least. Ops don't track right. Only the Modern Warfare store is accessible and even that won't load right 50% of the time. The "News" section is updated less than the games themselves, which is a HUGE disappointment considering all the things constantly going on with COD. It would be great to just check for new info in the app rather than having to
check all the review sites to find out what's going on. Also, I enjoy watching league play on a regular basis when the season is going, but the last thing I give a crap about is what league gamers want for Christmas or what they did to celebrate their win. Hard to understand why they waste time having someone write that useless and uninteresting
garbage when there are updates and in game trends that people actually WANT to read about. Seems like they could make this app a lot more useful if they would quit using it to push unwanted product. The stats are accurately updated and I'm able to check out previous games both multiplayer/warzone which are both separated making for easy
distinction, K/D SPM highest kill streak, etc. I do wish you could view others information as well to see how your competing against your friends, and the biggest thing I wish was integrated is the load out manager for the new MW it seems black ops 4 is the only one available, other than that the app is nice, you get occasional in games tokens and
gifts and you can view most info you are looking for, if it was better and keeping track or friends stats and there was a MW load out manager this would be an easy 5 stars. Regardless I appreciate the team for continued updates on the app because it's very easy for companies to just abandon apps like this and let them get outdated with minimal
 maintenance, also please let me turn off cross play lol I can't deal with the sweaty PC players anymore haha, I mean I can but, you know what I mean lol The developer, Activision Publishing, Inc., indicated that the app's privacy policy. The
following data may be used to track you across apps and websites owned by other companies: Location Contact Info Identifiers Usage Data The following data may be collected but it is not linked to your identity: Privacy practices may vary, for example
 based on the features you use or your age. Learn More Developer Website App Support Privacy Policy Call of Duty Mobile is not cross-platform. Because of the limitations within mobile play, you are unable to play with users on PC, Xbox, or PS4. Call of Duty Mobile is the official Call of Duty designed exclusively for mobile phones. Players can play
iconic multiplayer maps and modes anytime, anywhere. Similar to Call of Duty: Modern Warfare, COD Mobile features Battle Royale and Multiplayer but also dives deeper into the community favorite Zombies mode. Although you can't play cross platform, you are still able to add, invite, and team up with friends on the same platform. How to add friends If you are looking to run a few games with friends on Call of Duty Mobile, tap on the Friend Icon at the top of the main menu and select Add Friends. Enter their profile. Press the golden icon and a friend request will be sent to that user. Once your friend accepts, you will be able to see their
profile on your friend's list. If you are looking to run a few games with friends on Call of Duty Mobile, simply tap on the Friends option. Your online friends should
appear on the right side of the screen. From there, tap their names to invite them. Feature photo courtesy of Activision. For more Call of Duty news, check out our featured Call of Duty related news! Related Wikipedia list article Cross-platform play is the ability to allow different gaming platforms to share the same online servers in a game, allowing players to join together regardless of the platform they own. Since the Dreamcast and PlayStation 2, there have been online video games that support cross-play. Listed here is an incomplete list of games that support cross-play with their consoles,
computers, mobile and handheld game consoles note when using. Games which currently support cross-platform play This is a dynamic list and may never be able to satisfy particular standards for completeness. for Xbox, to Windows Users, New York Times, March 14, 2007. ^ Way of Redemption on Twitter. Online Features and Support End Feb 10, 2018. Retrieved from " 2You do not have permission to edit this page, for the following reasons: Your IP address is in a range that has been blocked on all Wikimedia Foundation wikis. The block was
made by Martin Urbanec (meta.wikimedia.org). The reason given is Open proxy. Start of block: 16:11, 6 April 2022 Your current IP address is 95.216.244.183 and the blocked by mistake, you can find
additional information and instructions in the No open proxies global policy. Otherwise, to discuss the block please post a request for review on Meta-Wiki or send an email to the stewards@wikimedia.org including all above details. You are currently unable to edit Wikipedia due to a block affecting this IP
address. This does not affect your ability to read Wikipedia pages. Most people who see this message have done nothing wrong. Some kinds of blocks restrict editing from specific service providers or telecom companies in response to recent abuse or vandalism, and affect other users who are unrelated to that abuse. See below if you do not believe you
have done anything wrong. Editing from 95.216.0.0/16 has been blocked (disabled) by ST47 for the following reason(s): The IP address that you are currently using has been blocked from editing Wikipedia. You
 will not be able to edit Wikipedia using a web host or colocation provider because it hides your IP address, much like a proxy or VPN. We recommend that you attempt to use another connection to edit. For example, if you use a proxy or VPN to connect to the internet, turn it off when editing Wikipedia. If you edit using a mobile connection, try using a
Wi-Fi connection, and vice versa. If you have a Wikipedia account, please log in. If you do not have any other way to edit Wikipedia, you will need to request an IP block exemption. If you are confident that you are not using a web host, you may appeal this block by adding the following text on your talk page: { {unblock|reason=Caught by a colocation}
                                                                                                                                                           _. Place any further information here. ~~~~}}. You must fill in the blank with your IP address can be determined here. Alternatively, if you wish to keep your IP address private you can use the unblock ticket request system.
There are several reasons you might be editing using the IP address of a web host or colocation provider (such as if you are using VPN software or a business network); please use this method of appeal only if you think your IP address is in fact not a web host or colocation provider. Administrators: The IP block exemption user right should only be
 applied to allow users to edit using web host in exceptional circumstances, and requests should usually be directed to the functionaries team via email. If you intend to give the IPBE user right, a CheckUser needs to take a look at the account. This can be requested most easily at SPI Quick Checkuser Requests. Unblocking an IP or IP range with this
template is highly discouraged without at least contacting the blocked, you will usually still be able to edit your user talk page and email other editors and administrators. For information on how to proceed, first see the FAQ for blocked users and the guideling the blocked users are guideling to the guideling the blocked users are guideling to the guideling 
on block appeals. The guide to appealing blocks may also be helpful.
