## Litres and millilitres worksheet grade 3

A collection of worksheets and volume and capacity activities. Work with liters and milliliters, estimate capacity and volume, reading stairs and more. Understanding the measurement units of the capacity measuring using the stairs that convert ML and L using ML & L (10L) read the scale of a 10L container, converting between milliliters and liters. Using ML & L (2L) read the scale of a 2L container, converting between milliliters and liters. The white worksheet container and display returns to register and get access to:  $\hat{A}$ ,  $\hat{a}$ , all response keys  $\hat{A}$ ,  $\hat{A}$ , an announcement without experience  $\hat{A}$ ,  $\hat{A}$ , premium / full screen pdf file  $\hat{A}$ ,  $\hat{a}$ , unlimited access In this cut-and-paste activity, children get hands-on the practical estimate of metric volumes of various containers. Using the volume of liquid in a pipette, a perfume bottle, and a bottle of water as a reference, students correspond a series of word 12 measurement problems with 12 answers. Designed for a third-degree mathematical curriculum, this estimation activity is a great way for children to work on their understanding of the real world of liters and milliliters.  $\hat{A}$   $\hat{a}$   $\hat{e}$   $\hat{Y}$  See, in a plane lesson  $\hat{a}$   $\hat{e}$  View Answers $\hat{A}$   $\hat{a}$   $\hat{e}$  Add to Collection $\hat{A}$   $\hat{a}$   $\hat{e}$  Awards Digitallycommon Core Standardstexas essential knowledge and Skills (TEKS) Virginia Standards of Learning (Sol) BC Standard performanceSalberta Study program A Australian Curriculum (Acara) Victorian Curriculum (F-10) You are here: Home  $\hat{A}$   $\hat{e}$   $\hat{e}$  Worksheets  $\hat{A}$   $\hat{e}$   $\hat{e}$  degree 3, Measurement Create an unlimited supply of worksheets for the conversion of the measurement units for the Grade 3 - both the usual units and metric units. Worksheets can be made in HTML or PDF format  $\hat{A}$   $\hat{e}$   $\hat{a}$ ,  $\hat{a}$  - both are easy to print. You can also customize them using the generator below. On this page, you will find: in a grade 3, children learn some conversions easy between The measurement units. For example, convert a larger unit into smaller units (2 ft in 24 inches or 4 cm in 40 mm). Depending on where you live and follow the standards, students can also do this The other way: Write 36 inches like 3 feet or 300 cm like 3 m. anyway, conversion problems in grade 3 should be relatively easy, because being able to change the measurement units in others are based on Multiplication tables, that children are usually learning in 3  $\hat{A}$   $\hat{a}$   $\hat{e}$  grade. Then again, conversions are a large application of multiplication tables, giving children a real life context for tables. You can choose to include inches, feet, yards, miles, ounces, cups, pets, liters, gallons, ounces, pounds, millimeters, centimeters, meters, miles, grams, kilograms, liters and milliliters. It is also possible to make worksheets for the metric system: Unit with Milli, Centi, Deka, Deka, Hetto and Kilo prefixes. The worksheets of the measurement units level of difficulty: 1 $\hat{a}$ , (eg 2 ft =  $\hat{\quad}$  in or 5 l =  $\hat{\quad}$  ml) 2 $\hat{A}$   $\hat{e}$  (eg 25 in =  $\hat{\quad}$  ft  $\hat{\quad}$  in) 3 $\hat{a}$  (eg 218 IN =  $\hat{\quad}$  ft  $\hat{\quad}$  in) 4 (always using the decimals, eg 5.77 ft =  $\hat{\quad}$  in or 9.32 m =  $\hat{\quad}$  cm) The difficulty levels work a little differently depending on whether you choose individual units o Conversions between all metric units. Please check which effect by making a worksheet, then return to this page using the "Back" button on your browser. Decimal figures: maximum number of decimals used for the smallest unit: 0 1 2 3 4 5 6 Maximum number of decimals used for the larger unit: 0 1 2 3 4 5 6 Round replies to 0 1 2 3 4 5 6 digits again, the decimal figures work a little different depending on the level of difficulty and the type of conversion chosen. Some difficulty levels for a certain type of conversion will not accept decimal figures at all.
