It's even easier. We will stay on the details as shown below. Browse the camera folder on your iPhone and find your favorite photo that you want to use as a new background on your iPhone. Press it to select and display on the photo. In the lower left corner, you will find the sharing options below. Screen to reveal the possibility of using as a background. It depends, you can therefore move and resize the selected photo, then define it as a background for the iPhone locking screen, the home screen or both. Identify the image file you want to use in a Finder window or on your desktop computer. Chlic Control (or right -click on the mouse file), then select the desktop image in the quick selection. If you use several views, this will change the background from a main display. If you do not see the desktop settings in the quick selection menu, you should see a submenu with services instead. From there, select background settings - from the menu. In the background settings, you will see an overview image. Under the background is a list of outings. And then the color. Thanks to the painting folder, you can see and view the presentation. Click the empty part of the desktop and choose a personal one. The Adjusting Control Panel will appear. In the lower left corner of the window, click the desktop background. Click any image to quickly place Windows 7 on the background of the desktop. Did you find a goalkeeper? To keep the desktop, click "Save changes". If not, click the image placing menu to display more options. Or if you are still looking, go to the next step. Click the Browse button and click the file from the personal images folder. Most people store digital photos in a folder or photo library. When you are satisfied with your choice, click Save the changes to remove the desktop background window. Exit the program and leave the desktop as the background of the selected photo. Background
