Congruent shapes worksheet answers

October 10, 2019 corbettmaths Geometry (NCTM)Analyze characteristics and properties of two- and three-dimensional geometric shapes and develop mathematical arguments about geometric relationships. Identify, compare, and analyze attributes of two- and three-dimensional shapes and develop vocabulary to describe the attributes. Classify two- and three-dimensional shapes according to their properties and develop definitions of classes of shapes such as triangles and pyramids. Explore congruence and similarity. Use visualization, spatial reasoning, and geometric modeling to solve problems. Recognize geometric ideas and relationships and apply them to other disciplines and to problems that arise in the classroom or in everyday life. Grade 3 Curriculum Focal Points (NCTM)Geometry: Describing and analyzing properties of two-dimensional shapes Students describe, analyze, compare, and classify two-dimensional shapes by their sides and angles and connect these attributes to definitions of shapes. Students investigate, describe, and reason about decomposing, combining, and transforming polygons to make other polygons. Through building, drawing, and analyzing two-dimensional shapes, students understand attributes and properties of two-dimensional space and the use of those attributes and properties in solving problems, including applications involving congruence and symmetry. Name-Identifying Similar and Congruent Shapes Determine if the shapes shown are 'similar', 'congruent' or 'neither'. Answers 1) 2) similar 1. congruent 2. neither 3) 4) 3. neither 4. similar 5. 5) 6) similar 6. similar 7. 7) 8) congruent 8. congruent 9. similar 10. 9) 10) congruent 11. neither 12. 11) 12) similar 13. congruent 14. neither 15. 13) 14) neither 16. 15) 16) 1-10 94 88 81 75 69 63 56 50 44 38 Math 5 11-16 31 25 19 13 60 Math Congruent shapes are the same size and shape. In this math worksheet, your child will identify all the triangles with the same side lengths and angles.
