Where do most organisms get their energy

Danny Lipford with homeowners Bill and Toni Riales.Homeowners Bill and Toni Riales have been living in their house for 14 years, and would like to reduce clutter and better organize the storage space in their attic, pantry, and closets.Wire shelving is perfect for well-organized pantries.Kitchen Pantry OrganizationTo improve storage in the kitchen pantry, self-adhesive pivoting hooks (3M Command 17067) from The Home Depot were attached to the inside of the pantry door to hold rolls of plastic wrap, wax paper, and aluminum foil.A paper towel rack and a storage container for plastic bags (SimpleHuman KT1166) were also attached to the inside of the pantry door to provide easy access.To improve the storage of canned goods in the pantry, wire shelves were cut to size with a hacksaw, then mounted upside down and at a downward slope so cans roll to the front as they are used.Watch DIY Kitchen Pantry Storage Solutions to find out more, and How to Add Roll Out Wire Baskets for another idea to improve the storage space in a kitchen.Rugged storage boxes with clear tops, like this one, are perfect for attic storage.Attic Storage SolutionsTo better utilize storage space in the walk-in attic, a freestanding metal storage shelf unit from The Home Depot was installed to hold plastic storage containers.On the other end of the attic, housewrap was stapled to the studs to cover the exposed wall insulation.Metal closet rod brackets were then screwed to the studs, and a closet rod installed to allow storage of seldom used clothes in zippered hanging bags.Watch Build a Raised Attic Storage Platform for another idea to increase the storage space in your attic.This DIY hanging shelf is mounted under an entertainment center.Entertainment Center Hanging ShelfA hanging shelf was constructed to hide the tangle of cords and organize the electronics in the sideboard which serves as an entertainment center in the Riales' home.We started by building a three-sided box from 1" x 12" lumber. After the box had been stained and sealed, a piece of 1x12 was attached to the drawer runners on the bottom of the sideboard. The box was then screwed to the attached 1x12 to hold it in place.Once the electronic components had been installed on the hanging shelf, plastic zip ties were used to organize the tangle of wires. A 1" x 4" was painted the same color as the walls and installed under the sideboard to hide the wires from sight.Read our article on DIY Home Theater Installation to find out how to hook up speakers for your TV.Make sure your closets have maximum storage. Add shelves with cleats or track systems for ease. (©Yury Gubin, Adobe Stock Photos)Storage Closet OrganizationTo increase the storage capacity in a closet, two 16" wide shelves were cut to run the length of the closet. Wall cleats were cut to length from 1x4 lumber and nailed to the walls to support the shelves.A 1x4 center brace was installed vertically from the floor and attached to each of the shelves to keep them from sagging.Watch How to Install Closet Shelving and Installing Wire Track Shelving to find out more.DIY Revolving Decorative Storage ScreenTo convert a set of hinged screens into hidden shelves for storage:Fold a three-screen panel unit into a U-shape.Measure the width and depth on the inside of the screens.Cut MDF (medium density fiberboard) for shelves inside screens.Screws the shelves to the screens with metal brackets.Attach a piece of MDF to the bottom of the screens.Attach lazy susan hardware to the bottom to allow the unit to revolve.Other Tips from This EpisodeSimple Solutions with Joe Truini: Installing Screw HooksWhen installing screw hooks in a wall or ceiling, drill a pilot hole slightly smaller in diameter than the shank of the hook. (Watch Video)Best New Products with Jodi Marks: Cargo Storage SolutionsPlastic storage bins, such as Rubbermaid Roughneck totes, are great for organizing. (Watch Video)Ask Danny Lipford: Painting Wrought IronBefore painting wrought iron, remove any rust and loose paint using sandpaper, a wire brush, or a rotary wire brush chucked in an electric drill. (Watch Video) Nuclear knowledge is critical now: the previous generation of nuclear personnel is retiring; countries are expanding nuclear programs; ageing nuclear installations may face challenges to ensure they can be operated safely, and there is a growing need for long-term management of radioactive waste and for countries phasing out nuclear programs. Do you work in the field of nuclear energy and realize that knowledge is used inefficiently and even could be lost? In this engineering and physics, you will learn how to use, transfer and preserve knowledge for the further development of nuclear power. The course is designed not only for students of nuclear specialties, but also for the staff of organizations operating in the field of peaceful use of nuclear energy. This course is also designed to meet the recommendations of the International Atomic Energy Agency (IAEA). The course was developed on the basis of IAEA publications on nuclear knowledge management. To take the course you do not need a deep knowledge in nuclear technology. Join us as you start your nuclear knowledge management journey.Institution: MEdPhxSubject: HumanitiesLevel: IntermediatePrerequisites: Language: EnglishVideo Transcript: English Identification of problems in the knowledge management system Retention of critical knowledge Application of nuclear knowledge management methods and tools in practice Section 1. Knowledge Concepts with an Introduction to Nuclear Knowledge 1.1. What is Knowledge? 1.2. Knowledge as a Resource 1.3. Nuclear Organization and Nuclear Knowledge Section 2. Knowledge Management (KM) History and Development 2.1. KM History, Definition and Models 2.2. KM Elements, Importance, Benefits, Tools and Techniques 2.3. KM Approaches Section 3. Knowledge Management in Nuclear Science and Technology 3.1. Nuclear Knowledge & Stakeholders 3.2. Nuclear Knowledge Management 3.3. Knowledge Loss Risk Assessment Section 4. Managing Tacit Knowledge 4.1. Tacit Knowledge 4.2. Techniques to Identify, Capture and Transfer Tacit Knowledge (Part 1) 4.3. Techniques to Identify, Capture and Transfer Tacit Knowledge (Part 2) Section 5. Managing Nuclear Information 5.1. History of Nuclear Information 5.2. Methods and Tools for Information Management 5.3. Knowledge Organization Systems Section 6. Nuclear Knowledge Management Organizational Challenges 6.1. Integration of NKM in Organizational Management System 6.2. Knowledge-Sharing Culture 6.3. Set Up, Implementation and Assessment of NKM Projects Section 7. Implementing Knowledge Management in Nuclear Organizations 7.1. KM in Nuclear Power Plant 7.2. KM in R&D Organization 7.3. KM in University Section 8. Nuclear Knowledge Management Maturity Assessment 8.1. KM Assessment: Elements and Steps 8.2. IAEA Self-Assessment Model for NPPs and R&D Organizations 8.3. IAEA Self-Assessment Model for Universities Simple over-the-door shoe organizers are brilliant hacks when it's time to tame the clutter in your home. Image: Liz Foreman for HouseLogic Bulk shoppers and anyone with more stuff than storage, rejoice: You can reclaim your home from clutter with hanging shoe organizers. Sure, they're amazing tools for wrangling homeless sneakers and ballet flats. But there's another reason pro organizers adore them: Their numerous cubbies are perfect for containing odds and ends that drive homeowners mad. You know, that mass of knotted cords, your messy cabinet full of cleaning goods, that one disappearing mitten. Pick up a few of these genius inventions and let your inner neat freak take over. Here are six shoe organizer ideas to get you started. #1 Keep Bulk Buys in Check Instead of piling up towers of paper towels or toilet paper, hang a cloth shoe organizer from your basement or bathroom closet rod and store each roll in its own individual cubby to free up floor space. As a bonus, you won't have to fumble around trying to extract a roll from its plastic covering — just open the closet, grab, and go. (This tip applies to all kinds of bulk purchases, from canned goods to seltzer water.) #2 Corral Gift Wrap Not sure where to tuck away your collection of festive wrapping paper? Don't waste precious floor space by stuffing those awkward tubes in a box. Homeowner Angie Holden used a standard over-the-door organizer to keep her gift wrap in order after her under-the-bed storage system grew "too cumbersome to get out when I need it." Reserve three rows of the organizer's slots for the long wrapping paper tubes. The rolls will sit in the lowest one. To keep those puppies upright, attach elastic bands to the organizer, between the upper two rows of slots, and slide the tubes down through the elastic before they reach their resting place in the lower row. Make it a complete gift station by sewing a catchall bag to the bottom of the organizer for ribbon, tape, and bows. Yard & Patio No need to stash it all in the garage. Here's how to create tidy storage in your yard. Painting & Lighting Painting concrete surfaces requires more skill, tools, and time than throwing a coat on drywall. Here's how to do it right. Kitchen Durability is key for kitchen remodeling, but it doesn't have to cost a lot. #3 Cut the Cord on Clutter Don't let tangled tablet chargers and extra iPhone cords rule your home. Instead, use a shoe organizer to keep your electronic accessories out of sight and ready when you need them. Organization blogger Stefanie Sliger divided her various cables by type, stuffed each set into its own pocket, and labeled accordingly. (Think "Cables," "outlet adapters," and "HDMI.") "It's definitely easier to see, grab, and store cords using the shoe organizer," Sliger says. If you have extra space, those additional pockets are perfect for batteries and lightbulbs. Storage Ideas & Hacks Creating personalized bins is a good start. Storage Ideas & Hacks Homes don't clean themselves. But these easy-peasy rules (wake and make!) will make you feel like they do. Storage Ideas & Hacks Murphy beds are making a comeback for good reason. Storage Ideas & Hacks You know it's a good investment. You just need a way to do it with less money and time. Storage Ideas & Hacks You can fit an entire closet where? #4 Feed Your Kids Tired of your little ones leaving a trail of displaced soup cans and sideways pasta boxes as they dig through the pantry in search of something to snack on? Using a shoe organizer to sort your snacks "makes it easy for kids to snag grab-and-go snacks," like granola bars, applesauce, raisins, and juice boxes, says personal organizer MaryJo Monroe. Hang it over the pantry door for easy access. #5 Tame Winter Garb As fall becomes winter, figuring out how to keep your endless collection of mittens, gloves, and extra fluffy socks organized and accessible can be a nightmare. After a basket storage system failed to keep her family's winter accessories under control, blogger Jamie Rannila turned to a shoe organizer — a solution that has been particularly popular with her triplets. "This way of organizing makes it so easy for them to reach and put their items in their own compartment," Rannila says. #6 Create a One-Stop Cleaning Station Is your under-sink space cluttered with myriad sponges and half-empty spray bottles that needed to be pitched months ago? Stop digging through the dark to find the glass cleaner. A hanging shoe organizer in your pantry can make life so much easier — just stick each product and cleaning accessory in its own pocket. Voila! No more hunching and hunting.Related: Why Being Organized Saves You Money In Cleaning & Decluttering A bleach solution or rubbing alcohol is your best bet for keeping your home sanitized. How to Disinfect Your Home in the Time of Coronavirus Our winterizing your home checklist will help you keep your house cozy and safe from winter's frigid assault. 5 Crucial Cold Weather Tips for Preparing Your House for Winter Be the home on the block that bugs run from. 7 Ways to Make Your Yard & Home a Bug-Free Zone More curb appeal, less hassle. That's what these trees offer. 5 Trees That'll Withstand the Worst Storms and Still Look Gorgeous You'll get more livable space while getting rid of clutter. It's a win-win!
